Ecomini is the smallest model of rear loaded garbage compactor which is produced according to EN 1501 standart.

All operational, safety and mechanical properties of Ecomini is controlled and tested after finishing procedures.

Electrical system is produced according to EN 1501 standart.

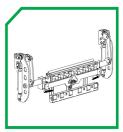

Hydraulic system can be produced for single or double control system.

Operational pressures are set to a calculated value and it is performed for maximum garbage collection.

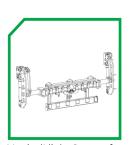

Diffrent types of bin lift systems are produced depending on customer demands.

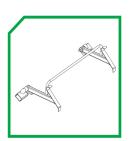

400-800 It Containers

Vertical Heavy System 120-240-360-770-1100 lt

VerticalLlight System for 120-240-360-770-1100 lt

Mechanic Lift Catcher

Pneumatic Lift Catcher

Horizontal System for 120-240-360-770-1100 lt
